## Model 400 PRO™

Bag-sewing System

- **Fast**
- **Reliable**
- **Safe**
- **Economical**

The affordable Model 400 PRO™ plain-sew system sets industry standards, offering cost-effective operation in the most demanding production environments. The heavy-duty 400 PRO is easy to operate and delivers quality performance at speeds that are twice as fast as any hand-held portable bag-closer. Operating at line speeds up to 60 linear feet per minute, the 400 PRO efficiently and reliably closes a variety of bag materials, including multi-wall paper and woven polypropylene.

A special feature of the 400 PRO is the Empress™ Model 100 Sewing Head with its patented, self-lubricating design. The 400 also has a portable, adjustable-height pedestal with casters and leveling jackscrews.

Use the Model 400 PRO sewing system in your manual, semi-manual or fully automated bag-closing operations and you'll see why the industry depends on Fischbein.
