

Sewing System MTR model

Description: This sewing system, fixed to the floor is used to close paper, polypropylene, or polyethylene (thickness +/-120 µ) bags.

Operation mode: The already reshaped bag is introduced into the infeed which guides the bag to the sewing head. The sewing process starts when the feeler switch is activated. At the end the rotary knife cuts the thread chain.

Characteristics:

- Head 50380B-100, sealed in oil against dust, dirt and foreign particles, fitted with a pressurized self-lubricating system.
- Rotary knife
- Start/stop of the sewing process controlled by feeler switch
- Infeed 4380-40M
- Variable pulley for easy synchronisation of the sewing head with conveyor speed
- Available in IP55 version (IP65 is optional)
